In order to help MBA Students gain more knowledge of various industries/functions, sharpen your job searching skills and make the right career choice after your 18-month study at CEIBS, CDC will organize the Career Exploration Day on September 22. We will invite business leaders/CEIBS alumni to share with you the concerned industries/functions, individual career planning and job searching strategies.

The series of sessions will mainly cover some of the following topics:

- Whole picture/insights of concerned industries/functions: changes, challenges, trends, etc.
- Best practice sharing with real cases to reinforce students’ understanding
- Major Job scope and typical career paths for the concerned areas.
- General candidate qualifications.
- Job searching and interview tips.
- Entry barrier and advise to students who want to change their careers

The table below shows you the basic sessions we will cover on the Day. Meanwhile CDC would like to work together with the Student Clubs to cover any other topics you wish to include in the evenings in September and October. Club leaders are welcome to work together with CDC staff concerned to tailor the focus according to your needs and interests.
